

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830

**1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION**

A. Product Name:	EP-1610
B. Version (Date) :	3 (July 01, 2019)
C. Chemical identification:	SATURATED CARBOXYLATED POLYESTER RESIN
D. Intended/Recommended Use:	Powder Coating
E. Contact Information:	
■ Company name	ZheJiang GuangHua Technology Co., Ltd
■ Address	No.3 Huanyuan East Road, Yanguan Town, Haining, Zhengjiang, China
■ Telephone	86-573-87771666
■ Fax	86-573-87771222
■ Emergency call	86-573-87771199
F. Department:	R & D

**2. HAZARD IDENTIFICATION**

<b>2.1 Classification of the substance or mixture</b>	
Product Definition	Mixture
Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]	Not classified The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended.
<b>2.2 Label elements</b>	
Signal Word	No signal word
Hazard Statements	No known significant effects or critical hazards
Precautionary Statements - Code	Contains benzene-1,2,4-tricarboxylic acid 1,2-anhydride. May produce an allergic reaction. Safety data sheet available on request.
<b>Precautionary statements</b>	
- Prevention	Not applicable
- Response	Not applicable
- Storage	Not applicable
- Disposal	Not applicable
Hazardous ingredients	
<b>2.3 Other hazards</b>	
Other hazards which do not result in classification	Fine dust clouds may form explosive mixtures with air. Handling and/or processing of this material may generate a dust which can cause mechanical irritation of the eyes, skin, nose and throat.

**3. COMPOSITION/ INFORMATION ON INGREDIENTS**

3.1 Substances / 3.2 Mixtures		Mixture	
Product/ingredient name	Identifiers	%	Classification Regulation (EC) No. 1272/2008 [CLP]
benzene-1,2,4-tricarboxylic acid	EC: 208-432-3 CAS: 528-44-9	≤3	Skin Irrit. 2, H315 Eye Irrit. 2, H319 STOT SE 3, H335 See Section 16 for the full text of the H statements declared above.
benzene-1,2,4-tricarboxylic acid 1,2-anhydride	REACH #: 01-2119489422-34 EC: 209-008-0 CAS: 552-30-7 Index: 607-097-00-4	≤1	Eye Dam. 1, H318 Resp. Sens. 1, H334 Skin Sens. 1, H317 STOT SE 3, H335

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit

and hence require reporting in this section.

4. FIRST AID PROCEDURES	
<b>4.1 Description of first aid measures</b>	
<b>Eye contact:</b>	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
<b>Inhalation :</b>	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
<b>Skin contact:</b>	Wash contaminated skin with soap and water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
<b>Ingestion:</b>	Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
<b>Protection of first-aiders</b>	No action shall be taken involving any personal risk or without suitable training.
<b>4.2 Most important symptoms and effects, both acute and delayed</b>	
<b>Over-exposure signs/symptoms</b>	
<b>Eye contact:</b>	Adverse symptoms may include the following: irritation redness
<b>Inhalation :</b>	Adverse symptoms may include the following: respiratory tract irritation coughing
<b>Skin contact:</b>	No specific data.
<b>Ingestion:</b>	No specific data.
<b>4.3 Indication of any immediate medical attention and special treatment needed</b>	
<b>Notes to physician</b>	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
<b>Specific treatments</b>	No specific treatment.
5. FIRE FIGHTING PROCEDURES	
<b>5.1 Extinguishing media</b>	
<b>Suitable</b>	Use dry chemical powder.
<b>Not suitable</b>	Avoid high pressure media which could cause the formation of a potentially explosible dust-air mixture.
<b>5.2 Special hazards arising from the substance or mixture</b>	
<b>Hazards from the substance or mixture</b>	Fine dust clouds may form explosive mixtures with air.
<b>Hazardous combustion products</b>	Decomposition products may include the following materials: carbon dioxide carbon monoxide (dense) black smoke aldehydes organic acids
<b>5.3 Advice for firefighters</b>	
<b>Special protective actions for fire-fighters</b>	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
<b>Special protective equipment for fire-fighters</b>	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for firefighters (including helmets, protective boots and gloves) conforming to European standard EN469 will provide a basic level of protection for chemical incidents.
<b>Additional information</b>	Fine dust clouds may form explosive mixtures with air.
6. ACCIDENTAL RELEASE PROCEDURES	
<b>6.1 Personal precautions, protective equipment and emergency procedures</b>	

<p><b>For non-emergency personnel</b></p>	<p>No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing dust. Put on appropriate personal protective equipment.</p>
<p><b>For emergency responders</b></p>	<p>If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".</p>
<p><b>6.2 Environmental precautions</b></p>	<p>Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).</p>
<p><b>6.3 Methods and material for containment and cleaning up</b></p>	
<p><b>Small spill</b></p>	<p>Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.</p>
<p><b>Large spill</b></p>	<p>Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.</p>
<p><b>6.4 Reference to other sections</b></p>	<p>See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.</p>
<p><b>7. STORAGE AND HANDLING</b></p>	
<p>The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).</p>	
<p><b>7.1 Precautions for safe handling</b></p>	
<p><b>Protective measures</b></p>	<p>Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Persons with a history of skin sensitisation problems or asthma, allergies or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition sources. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container</p>
<p><b>Advice on general occupational hygiene</b></p>	<p>Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.</p>
<p><b>7.2 Conditions for safe storage, including any incompatibilities</b></p>	<p>Do not store above the following temperature: 30°C (86°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. Store in original container, protected from direct sunlight. Keep away from heat and direct sunlight.</p>

<b>7.3 Specific end use(s)</b>					
<b>Recommendations</b>		Resin system used in the production of coatings.			
<b>Industrial sector specific solutions</b>		Not available.			
<b>Remarks</b>		Prevent formation of dust clouds. Earth connection against static electricity.			
<b>8. EXPOSURE CONTROL/INDIVIDUAL PROTECTION</b>					
The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.					
<b>8.1 Control parameters</b>					
<b>Occupational exposure limits</b>					
<b>Product/ingredient name</b>		<b>Exposure limit values</b>			
benzene-1,2,4-tricarboxylic acid 1,2-anhydride		EH40/2005 WELs (United Kingdom (UK), 12/2011). Inhalation sensitiser. TWA: 0.04 mg/m <sup>3</sup> 8 hours. STEL: 0.12 mg/m <sup>3</sup> 15 minutes.			
<b>Recommended monitoring procedures</b>		If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.			
<b>DNELs/DMELs</b>					
<b>Product/ingredient name</b>	<b>Type</b>	<b>Exposure</b>	<b>Value</b>	<b>Population</b>	<b>Effects</b>
benzene-1,2,4-tricarboxylic acid 1,2-anhydride	DNEL	Long term Inhalation	17.5 mg/m <sup>3</sup>	Workers	Systemic
	DNEL	Short term Inhalation	35 mg/m <sup>3</sup>	Workers	Systemic
	DNEL	Long term Dermal	5 mg/kg bw/day	Workers	Systemic
	DNEL	Long term Inhalation	4.4 mg/m <sup>3</sup>	Consumers	Systemic
	DNEL	Long term Dermal	2.5 mg/kg bw/day	Consumers	Systemic
	DNEL	Long term Oral	2.5 mg/kg bw/day	Consumers	Systemic
	DNEL	Short term Inhalation	4.4 mg/m <sup>3</sup>	Consumers	Systemic
<b>PNECs</b>					
<b>Product/ingredient name</b>	<b>Compartment Detail</b>		<b>Value</b>	<b>Method Detail</b>	
benzene-1,2,4-tricarboxylic acid 1,2-anhydride	Fresh water		0.739 mg/l	-	
	Marine water		0.074 mg/l	-	
	Intermittent releases		7.39 mg/l	-	
	Sewage Treatment Plant		10 mg/l	-	
	Fresh water sediment		4.97 mg/kg dwt	-	
	Marine water sediment		0.497 mg/kg dwt	-	
	Soil		9.55 mg/l Kg dwt	-	
<b>8.2 Exposure controls</b>					

<b>Appropriate engineering controls</b>	Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
<b>Individual protection measures</b>	
<b>Hygiene measures</b>	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
<b>Eye/face protection</b>	Full-face mask
<b>Hand protection</b>	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
<b>Skin and body</b>	Working clothes.
<b>Respiratory protection</b>	Wear dust protection mask P2.
<b>Environmental exposure controls</b>	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
<b>Remarks</b>	All chemical protective gloves are suitable to prevent contact with the skin. The choice of gloves should be aimed at physical protection of the hands.

**Advice on personal protection is applicable for high exposure levels. Select proper personal protection based on a risk assessment of the actual exposure situation.**

**9. PHYSICAL AND CHEMICAL PROPERTIES**

<b>A. Color</b>	pale	<b>K. Saturation In Air(% by Vol.)</b>	Not available
<b>B. Appearance</b>	flakes	<b>L. Evaporation Rate</b>	Not available
<b>C. Odor</b>	odorless	<b>M. Solubility In Water</b>	Not available
<b>D. Boiling Point</b>	Not available	<b>N. Volatile Organic Content</b>	< 1 %
<b>E. Melting Point</b>	Not applicable	<b>O. Flash Point</b>	> 200 °C(Cleveland Open Cup)
<b>F. Vapor Pressure</b>	Not applicable	<b>P. Flammable Limits(% by Vol)</b>	Not available
<b>G. Specific Gravity/Density</b>	1.2g/cm <sup>3</sup> @ 20°C	<b>Q. Auto-ignition temperature</b>	> 300 °C(VDI Guideline 2263)
<b>H. Vapour density</b>	Not available	<b>R. Decomposition Temperature</b>	Not available
<b>I. Percent Volatile(% by wt.)</b>	Not available	<b>S. Partition coefficient</b>	Not available
<b>J. PH</b>	Not available		

**10. STABILITY AND REACTIVITY**

10.1 Reactivity	No specific test data related to reactivity available for this product or its ingredients.
10.2 Chemical stability	The product is stable. Stable under recommended storage and handling conditions (see Section 7).
10.3 Possibility of hazardous reactions	Under normal conditions of storage and use, hazardous reactions will not occur.
10.4 Conditions to avoid	Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Prevent dust accumulation. Decomposes on heating to high temperature.
10.5 Incompatible materials	Reactive or incompatible with the following materials: oxidizing materials
10.6 Hazardous decomposition products	No specific data.

**11. TOXICOLOGICAL INFORMATION**

11.1 Information on toxicological effects					
<b>Acute toxicity</b>					
Product/ingredient name	Result	Species	Dose	Exposure	
benzene-1,2,4-tricarboxylic acid	LC0 Inhalation Dusts and mists	Rat	>3750 mg/m <sup>3</sup>	4 hours	
	LD50 Dermal	Rabbit	>2000 mg/kg ( LD0 = 2000 mg/kg )	-	
	LD50 Oral	Rat - Male, Female	2730mg/kg	-

<b>13. DISPOSAL CONSIDERATIONS</b>				
The information in this section contains generic advice and guidance. Reference number: 2008/98/EC.				
<b>13.1 Waste treatment methods</b>				
<b>Product</b>				
<b>Methods of disposal</b>		The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.		
<b>Hazardous waste</b>		Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 2008/98/EC.		
<b>Packaging</b>				
<b>Methods of disposal</b>		The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.		
<b>Special precautions</b>		This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.		
<b>14. TRANSPORT REGULATIONS</b>
